SKILLS

• AI and Web Development:

Proficient in building AI-powered web applications using the **MERN stack**, with expertise in **frontend development**, **backend development**, and **API integration**.

• Full-Stack Web Development:

Expertise in building responsive and scalable web applications using **Ruby on Rails** and the **MERN** stack with integration of AI/ML models for enhanced functionality.

• Backend Development:

Strong foundation in creating robust **server-side logic** using Ruby on Rails, Node.js, and Express.js, with RESTful APIs and **secure authentication**.

• Database Management:

Experienced in designing and managing relational databases using **MySQL**, **PostgreSQL** ensuring data integrity and performance.

• Version Control:

Proficient in using **Git** and **GitHub** for collaborative development, version control, and maintaining codebases effectively.

SEMESTER PROJECTS

Blog App: Developed a **Ruby on Rails** blog app with user auth, post management, comments, and category-based filtering. Scaled to handle 100+ users and 500+ posts using **MVC** and **RESTful routing**.

Personalized Fitness Dashboard: Create a fitness app that offers **AI-powered** workout and diet plans, tracking progress with a 30% improvement in user goals within 3 months.

Rental Booking Platform (Inspired by Airbnb): Built a **full-stack Ruby on Rails app** with property listings, user auth, bookings, reviews, and **RESTful APIs** incorporated core Rails concepts and gems for scalability and dynamic data handling.

Image Processing App: Develop a **React-based** web application with advanced image processing features, allowing users to upload, edit, and download images with background removal functionality.

Social Network Application: Console-based networking application implemented using the concepts of OOP, supporting features of adding friends, commenting, liking pictures, and viewing timelines.

FINAL YEAR PROJECT

Developed a **MERN-based** website integrated with AI for the diagnosis, progression, and prediction of ocular diseases. The system uses retinal images for accurate diagnosis, progression analysis, and congenital risk prediction, offering real-time medical insights.

EDUCATION

(2021-2025)
FAST-NUCES LAHORE
Computer science

(2020)
PUNJAB GROUP OF COLLEGES
FSC (pre-medical + additional maths)

LANGUAGES AND TOOLS

Languages: Ruby on Rails, Python, SQL, Javascript, Postgre SQL, C++, HTML

Frameworks & Libraries:

React.js, Node.js, Express.js, TensorFlow, Keras, Django

Platforms: Git/GitHub, MySQL, MongoDB, Visual Studio Code, Ubuntu, Google Colab, Firebase

Other Skills: REST APIs, Object-Oriented Programming (OOP), Data Analysis
